

SeaMonkey

SeaMonkey is a free and open-source Internet suite.^[4] It is the continuation of the former Mozilla Application Suite, based on the same source code,^[5] which itself grew out of Netscape Communicator and formed the base of Netscape 6 and Netscape 7.^[6]

SeaMonkey was created in 2005 after the Mozilla Foundation decided to focus on the standalone projects Firefox and Thunderbird. The development of SeaMonkey is community-driven, in contrast to the Mozilla Application Suite, which until its last released version (1.7.13) was governed by the Mozilla Foundation. The new project-leading group is called the *SeaMonkey Council*.^[4]

Compared to Firefox, the SeaMonkey web browser keeps the more traditional-looking interface of Netscape and the Mozilla Suite, notably the XUL architecture. This allows the user to extend SeaMonkey by modifying add-ons for Thunderbird or the add-ons that were formerly compatible with Firefox before the latter switched to WebExtensions.^{[7][8]}

Components

SeaMonkey consists of a web browser, which is a descendant of the Netscape family, an e-mail and news client program (SeaMonkey Mail & Newsgroups, which shares code with Mozilla Thunderbird), and an HTML editor (SeaMonkey Composer)). The software suite supports skins. It comes with

Mail

SeaMonkey Mail is a traditional e-mail client that includes support for multiple accounts, junk mail detection, message filters, HTML message support, and address books, among other features.^[11] It shares code with Mozilla Thunderbird; both Thunderbird and SeaMonkey are built from Mozilla's comm-central source tree.^[12]

Composer

SeaMonkey Composer is a WYSIWYG HTML editor descended from Mozilla Composer. Its main user interface features four tabs: Normal (WYSIWYG), HTML tags, HTML code, and browser preview. The generated code is HTML 4.01 Transitional.^[13] SeaMonkey Composer is no longer actively maintained, but the underlying editor code is shared with the Mail component.^[14]

Portability

The SeaMonkey project releases official builds for Linux, macOS, and Windows.^[2]

Naming

To avoid confusing organizations that still want to use the original Mozilla Suite, the new product needed a new name. After initial speculation by members of the community, a July 2, 2005 announcement confirmed that SeaMonkey would officially become the name of the Internet suite superseding the Mozilla Suite.

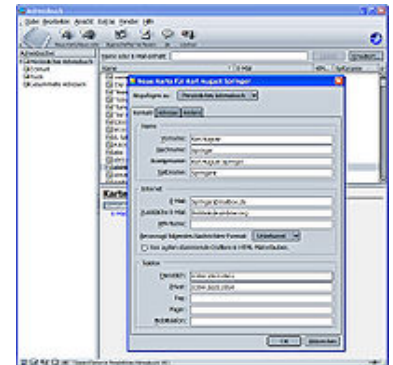

"Seamoney" (with a lowercase "m") refers to brine shrimp and had been used by Netscape and the Mozilla Foundation as a code name for the never-released "Netscape Communicator 5" and later the Mozilla Suite itself. Originally, the name "Seamoney" was derived by Netscape management to replace "Buttmoney", which their developers had chosen following an internal contest for the codename.^[15]

The SeaMonkey Council has now trademarked the name with help from the Mozilla Foundation.^[16] The project uses a separate numbering scheme, with the first release being called SeaMonkey 1.0. Despite having a different name and version number, SeaMonkey 1.0 is based on the same code as Mozilla Suite 1.7.

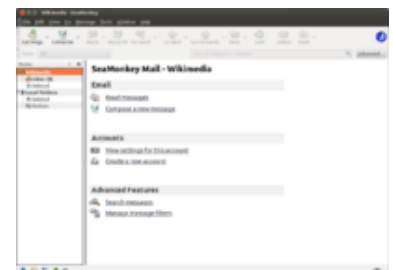

For trademark and copyright reasons,^[17] Debian rebranded SeaMonkey and distributed it as Iceape until 2013.

History

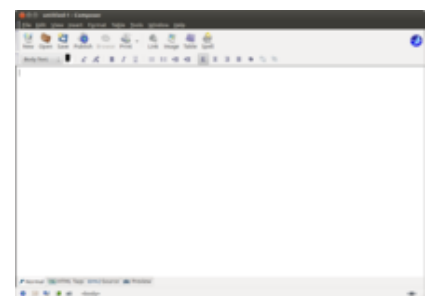

On March 10, 2005, the Mozilla Foundation announced that it would not release any official versions of Mozilla Application Suite beyond 1.7.x, since it had now focused on the standalone applications Firefox and Thunderbird.^[18] However, the Foundation emphasized that it would still provide infrastructure for community

Address book in SeaMonkey Mail 1.1.16

SeaMonkey Mail & Newsgroups 2.16

SeaMonkey Composer 2.16

members who wished to continue development. In effect, this meant that the suite would still continue to be developed, but now by the SeaMonkey Council instead of the Mozilla Foundation.

SeaMonkey was first released on September 15, 2005.^[2] SeaMonkey 1 was released on January 30, 2006.

Core Mozilla project source code was licensed under a disjunctive tri-license (before changing to MPL 2.0) that gave the choice of one of the three following sets of licensing terms: Mozilla Public License, version 1.1 or later, GNU General Public License, version 2.0 or later, GNU Lesser General Public License, version 2.1 or later.^[19]

SeaMonkey Navigator 1.0.2

Release history

Gecko Branch	Version	Release date	Significant changes
1.8	1.0 Alpha	September 15, 2005	
	1.0 Beta	December 19, 2005	
1.8.0	1.0	January 30, 2006 ^[20]	Official Version 1.0 release.
	1.0.1	April 13, 2006	Security updates and native support for Intel-based Macintosh computers, via Universal Binary.
	1.0.2	June 1, 2006	Stability improvement and security fixes.
	1.0.3	July 27, 2006	Stability improvement and security fixes.
	1.0.4	August 2, 2006	Small fix for a regression with the <u>Microsoft Media Server</u> protocol in 1.0.3.
	1.0.5	September 14, 2006	Stability improvement and security fixes.
	1.0.6 ^[21]	November 8, 2006	Stability improvement and security fixes.
	1.0.7	December 20, 2006 ^[22]	Stability improvement and security fixes.
	1.0.8	February 27, 2007	Stability improvement and security fixes.
	1.0.9	May 30, 2007	Stability improvement and security fixes. Marks the end of life for SeaMonkey 1.0.x series.
1.8.1	1.1 Alpha	August 30, 2006	Major feature work (https://bugzilla.mozilla.org/show_bug.cgi?id=sm1.1)
	1.1 Beta	November 8, 2006	
	1.1	January 18, 2007	Official Version 1.1 release.
	1.1.1	February 28, 2007	Stability improvement and security fixes.
	1.1.2	May 30, 2007	Stability improvement and security fixes.
	1.1.3	July 19, 2007	Stability improvement and security fixes.
	1.1.4	August 3, 2007	Stability improvement and security fixes.
	1.1.5	October 19, 2007	Stability improvement and security fixes.
	1.1.6	November 5, 2007	Several small problems in displaying certain web pages corrected
	1.1.7	November 30, 2007	Stability improvement and security fixes. Problem with running SeaMonkey from read-only application directories corrected. The last to be built for Solaris 8.

	1.1.8	February 7, 2008	Stability improvement and security fixes.
	1.1.9	March 25, 2008	Stability improvement and security fixes.
	1.1.10	July 2, 2008	Stability improvement and security fixes.
	1.1.11	July 15, 2008	Stability improvement and security fixes.
	1.1.12	September 23, 2008	Stability improvement and security fixes.
	1.1.13	November 12, 2008	Stability improvement and security fixes.
	1.1.14	December 16, 2008	Stability improvement and security fixes.
	1.1.15	March 18, 2009	Stability improvement and security fixes.
	1.1.16	April 8, 2009	Stability improvement and security fixes.
	1.1.17	June 22, 2009	Stability improvement and security fixes.
	1.1.18	September 3, 2009	Stability improvement and security fixes.
	1.1.19	March 16, 2010	Stability improvement and security fixes. End-of-life of 1.1.x product line. (https://www.seamonkey-project.org/news#2010-03-16) The last to support Windows 98/Me. The last to be built for Solaris 10.
1.9.1	2.0 Alpha 1	October 5, 2008	Toolkit transition (https://wiki.mozilla.org/SeaMonkey:suite_runner) and major feature work (https://wiki.mozilla.org/SeaMonkey:New_for_2.0)
	2.0 Alpha 2	December 10, 2008	Toolkit transition and major feature work
	2.0 Alpha 3	March 3, 2009	Toolkit transition and major feature work
	2.0 Beta 1	July 21, 2009	Follows Gecko 1.9.1.1 stable release, major feature work (https://www.seamonkey-project.org/releases/seamonkey2.0b1/changes)
	2.0 Beta 2	September 12, 2009	Major feature work (https://www.seamonkey-project.org/releases/seamonkey2.0b2/)
	2.0 RC 1	October 10, 2009	First release candidate (https://www.seamonkey-project.org/releases/2.0rc1)
	2.0 RC 2	October 19, 2009	Second release candidate (https://www.seamonkey-project.org/releases/2.0rc2)
	2.0	October 27, 2009	Official Version 2.0 release.

	2.0.1	December 15, 2009	Stability improvement and security fixes.
	2.0.2	January 11, 2010	Stability improvement and security fixes.
	2.0.3	February 17, 2010	Stability improvement and security fixes.
	2.0.4	March 30, 2010	Stability improvement and security fixes.
	2.0.5	June 22, 2010	Stability improvement and security fixes.
	2.0.6	July 20, 2010	Stability improvement and security fixes.
	2.0.7	September 7, 2010	Stability improvement and security fixes.
	2.0.8	September 15, 2010	Stability improvements only.
	2.0.9	October 20, 2010	Stability improvement and security fixes.
	2.0.10	October 28, 2010	Security fix.
	2.0.11	December 9, 2010	Stability improvement and security fixes.
	2.0.12	March 2, 2011	Security fix.
	2.0.13	March 23, 2011	Stability improvement and security fixes.
	2.0.14	April 28, 2011	Stability improvement and security fixes. This is the last version to support Mac OS X 10.4 Tiger and PowerPC Macs
1.9.3	2.1 Alpha 1	May 18, 2010	Feature work (https://www.seamonkey-project.org/releases/seamonkey2.1a1/)
	2.1 Alpha 2	July 7, 2010	New addons manager, Feature work (http://weblogs.mozillazine.org/seamonkey/archives/2010/07/seamonkey_21_al_1.html)
2.0	2.1 Alpha 3	August 24, 2010	Third alpha release
	2.1 Beta 1	October 20, 2010	First beta release
	2.1 Beta 2	February 14, 2011	Second beta release
	2.1 Beta 3	April 7, 2011	Third beta release
	2.1 RC 1	May 12, 2011	First release candidate
	2.1 RC 2	June 6, 2011	Second release candidate
	2.1	June 10, 2011	Official Version 2.1 release. The last to be built for OS/2.
5.0	2.2 Beta 1	June 22, 2011	First beta release
	2.2 Beta 2	June 28, 2011	Second beta release

	2.2 Beta 3	July 2, 2011	Third beta release
	2.2	July 7, 2011	Official Version 2.2 release.
